

Hydrovane Warranty Fluid

Protect your investment with genuine Hydrovane lubricants

Compressor fluids are not typically a topic of everyday conversation, but nonetheless its importance needs to be recognized since the fluid's functions have a direct impact on the ownership cost of your compressor. Fluid is the lifeblood of a compressor and enables it to run at maximum efficiency and reliability, resulting in a reduction of production costs.

While it's important to understand the overall general need for fluids, it's equally important to understand the complete picture and that there are different formulas designed to match compatibility with each rotary vane compressor. Hydrovane Fluids have proven that they can reduce energy consumption, MRO costs, waste disposal costs and also reduce lost productivity due to extended equipment downtime – all of which affect your bottom line.

**Hydrovane® Fluids
have proven that they

consumption, MRO
costs, waste disposal
costs and also reduce
lost productivity.**

Hydrovane warranty lubricants formulated for specific applications and environments:

CS-300

CS300 is a diester based lubricant, the standard lubricant in hydrovane Rotary Vane Compressors, except the RS compressor at 150 psi units. CS300 offers superior condensate separation and performs over a wide temperature range.

CSS-30

CSS-30 is a food grade lubricant specifically formulated to maximize the efficiency and lifespan of rotary vane compressors. CSS-30 is non-toxic and suitable for use in food processing facilities.

Proper fluids are crucial in maintaining the performance and efficiency of your compressor. We, at John Henry Foster, want to provide you with the tools and information necessary to ensure your compressors are getting the attention they need to perform at full capacity.
