

Insights

Real-time monitoring, analysis, and optimization for your UR robots. Stay up-to-date on your robot's performance, anywhere, anytime!

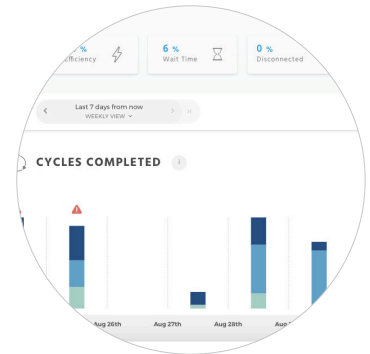

What's the real ROI of your robot cell?

Your robot is accountable
Get its KPIs

Do you know when your robot is stopped?

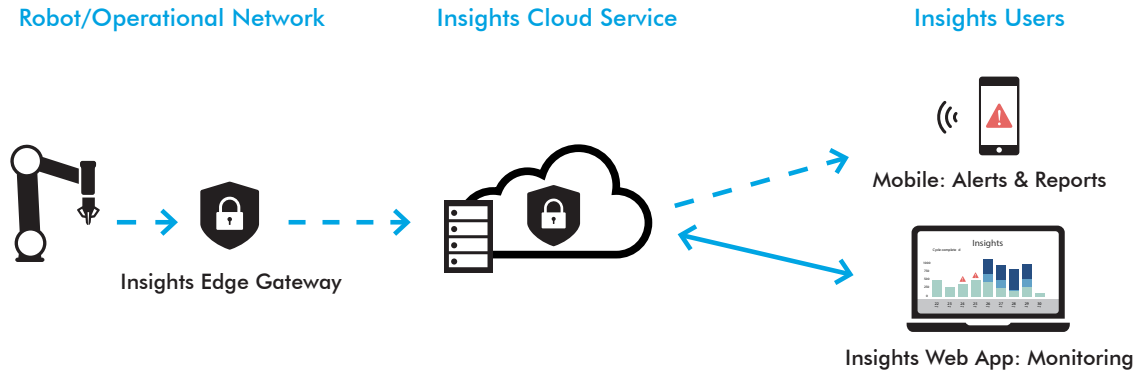

Be aware of production stops right away

How can you optimize your productivity?

Real-time robot data and performance timeline

How it works

As easy as 1-2-3!

1. Install the **Insights URCap** on your robot.
2. Connect your robot to the cloud securely by using the **Insights Edge Gateway**.
3. Pair your robot to your **Insights Cloud Service** account.

You can now see your robot data anytime, anywhere on insights.robotiq.com

Insights requires

- UR3, UR5 or UR10 (with CB3.1 controller)
- Internet connection
- Insights Edge Gateway (sold separately)

Subscription plans

Insights is a subscription-based, on demand cloud service to monitor robot operation and optimize productivity.

Choose the subscription plan that fits your needs.
