

Gardner Denver Warranty Fluid

Protect your investment with genuine Gardner Denver lubricants

There are a number of ways to help keep your air compression system running at peak performance, but few are more important than the fluid it requires. Fluids are the lifeblood of a compressor and have a direct impact on the cost of ownership of your compressor. They increase reliability and extend the life expectancy of your equipment.

While it's important to understand the overall general need for fluids, it's equally important to understand the complete picture and that there are different formulas designed to match compatibility with each rotary screw compressor. Gardner Denver AEON® warranty fluids have proven that they can reduce energy consumption, MRO costs, waste disposal costs and also reduce lost productivity due to extended equipment downtime – all of which affect your bottom line. In addition, all Gardner Denver AEON® fluids ensure the validity of your five or ten-year compressor warranty because they are factory-filled products.

Gardner Denver AEON®
Fluids have proven that
they can reduce energy
consumption, MRO
costs, waste disposal
costs and also reduce
lost productivity.

John Henry Foster (JHFoster) is a leading distributor and service provider for automation and compressed air systems. Our mission is to assist companies like yours automate their manufacturing applications to make the process a positive journey. We are committed to providing successful solutions that exceed production demands, reduce costs, and increase overall efficiencies.

Headquartered in Eagan, MN, with a location in Fargo, ND, we also offer a fully-equipped team of mobile technicians that provide service to the 5-state area. Contact us today at 800.582.5162 or jhfooster.com.

Gardner Denver's warranty lubricants formulated for specific applications and environments:

Gardner Denver

AEON® 4000

Life tests indicate a service interval up to three times longer than that of comparable petroleum based lubricants, depending on individual compressor characteristics and ambient conditions.

- Extended life lubricant; demulsible formulation
- Minimizes maintenance and downtime
- Characteristics of a synthetic in a petroleum blend

AEON® 9000SP

AEON® 9000SP is ideal for applications which require extended operating intervals. It is formulated for demulsibility and optimum viscosity over the compressors entire operating temperature range.

- Superior Protection synthetic lubricant
- Increased machine operating efficiencies
- Formulated for excellent condensate oil/water separation

AEON® 9000TH

AEON® 9000TH is an extended life lubricant for rotary screw compressors with oil injection operating under harsh service conditions with high compressor temperatures. It is ideal for rotary screw air compressor applications where oil is exposed to high operating temperatures needed to prevent condensation in high humidity applications. This lubricant may not be appropriate in applications with low ambient temperatures.

- Exceptional thermal stability
- Completely demulsible
- Long life at high temperature

AEON® 6000FG

AEON® 6000 Food Grade is a PAO (polyalphaolefin) blend, authorized by the USDA as an H-1 approved lubricant for use in federally inspected meat and poultry plants. It complies with FDA 21CFR 178.3570—lubricants for incidental food contact.

- Food grade extended life lubricant
- Minimizes maintenance and downtime
- Improved lubrication at high and low temperatures

Proper fluids are crucial in maintaining the performance and efficiency of your compressor. We, at John Henry Foster, want to provide you with the tools and information necessary to ensure your compressors are getting the attention they need to perform at full capacity. For more information, contact our Compressor Parts Department at 800-582-5162 or 651.681.5739 or email Compressor Parts Department at CompressorPartsDept@jhfooster.com
