

QuinSyn® Warranty Fluid

Protect your investment with genuine Quincy lubricants

There are a number of ways to help keep your air compression system running at peak performance, but few are more important than the fluid it requires. Fluids are the lifeblood of a compressor and have a direct impact on the cost of ownership of your compressor. They increase reliability and extend the life expectancy of your equipment.

While it's important to understand the overall general need for fluids, it's equally important to understand the complete picture and that there are different formulas designed to match compatibility with each rotary screw compressor. Quincy Compressor QuinSyn® warranty fluids have proven that they can reduce energy consumption, MRO costs, waste disposal costs and also reduce lost productivity due to extended equipment downtime – all of which affect your bottom line. In addition, all QuinSyn® fluids ensure the validity of your five or ten-year compressor warranty because they are factory-filled products.

Quincy QuinSyn® Fluids
have proven that they
can reduce energy
consumption, MRO
costs, waste disposal
costs and also reduce
lost productivity.

Quincy's warranty lubricants formulated for specific applications and environments:

QUINSYN® XP - Part Number 142784

QuinSyn® XP – A custom-blended polyol ester (POE) long life synthetic fluid. It is ideal for rotary screw air compressor applications where fluid is exposed to elevated temperatures for extended periods of time and is especially advantageous in high temperature applications.

QUINSYN® F - Part Number 110756

QuinSyn® F – A custom-blended food-grade polyalphaolefin (PAO) synthetic hydrocarbon fluid with improved lubrication at high and low temperatures, reduced volatility and compatibility with mineral oils and equipment designed for use with mineral oils. QuinSyn® F is USDA authorized for use in federally inspected meat and poultry plants. Its life expectancy is 6,000 hours under normal operating conditions.

QUINSYN® PG - Part Number 143808

QuinSyn® PG – A custom-blended polyalkylene glycol (PAG/ester) fluid offering improved lubrication at high and low temperatures, reduced volatility and a high viscosity index – plus excellent corrosion protection. QuinSyn® PG will not leave behind carbon residue and varnish when it oxidizes and is ideal for hot and humid environments or in applications prone to varnish build up.

QUINSYN® PLUS - Part Number 144046

QuinSyn® Plus – A next generation custom-blended polyalphaolefin PAO/polyol ester (POE) synthetic hydrocarbon fluid. QuinSyn® Plus has been improved with more forgiveness in higher temperature applications, longer life in harsh plant environments, and better resistance to forming sludge or varnish in the compressor. QuinSyn® Plus life expectancy under normal operating conditions is 8,000 to 10,000 hours.

Proper fluids are crucial in maintaining the performance and efficiency of your compressor. We, at John Henry Foster, want to provide you with the tools and information necessary to ensure your compressors are getting the attention they need to perform at full capacity.

For more information, contact our Compressor Parts Department at 800-582-5162 or

John Henry Foster (JHFoster) is a leading distributor and service provider for automation and compressed air systems. Our mission is to assist companies like yours automate their manufacturing applications to make the process a positive journey. We are committed to providing successful solutions that exceed production demands, reduce costs, and increase overall efficiencies.

Headquartered in Eagan, MN, with a location in Fargo, ND, we also offer a fully-equipped team of mobile technicians that provide service to the 5-state area. Contact us today at 800.582.5162 or jhfooster.com to learn more about how you might benefit from knowing us.
