Factory Service and Repair

FIELD SERVICE: Rogers has a highly responsive and trained national field service team that is always ready to serve your needs. They are trained to work on a variety of machines so they can get your system up and running with little down time.

REPAIR SHOP: Our 100,000 square foot facility in Portland, Oregon is outfitted with all of the necessary tools to rebuild compressor air-ends, vacuum pumps and blowers. If your compressor shuts down and it needs to be taken into the shop, we can send you a rental machine until yours is ready to go.

FACTORY SERVICE PROGRAM: The factory service program takes the maintenance obligations off your to-do list. You will no longer have to be concerned about missed service intervals, parts availability or incomplete services. Most importantly, you will significantly reduce unscheduled down time. Your facility will operate with higher energy efficiency and minimal interruption of your compressed air supply, which will save you money.

24/7 SERVICE: Rogers has service technicians available 24/7 to respond to emergencies. They will troubleshoot your system and fix any existing problem.

Compressed Air Audits

Our Audit and Consulting Group is trained to quickly understand your plant's air system and operational requirement. Our energy audit services can be tailored to meet your custom needs.

Rogers Machinery has conducted thousands of energy audits. In the process, we do the following:

- Evaluate equipment performance
- Use leak detection technology to identify wasted air
- Utilize utility incentive programs
- Reduce operating costs
- Provide periodic adjustments of system controls

Rogers is committed to making sure your compressed air system operates at its maximum efficiency.
