

## Are PMI Linear Guides Right For You?

- Are you looking to replace your existing linear guides?
- Do you need affordable linear motion solutions?
- How important is smoothness and accuracy for your application?
- Are long lead times impacting your production?
- Do you require custom guidance systems?

## PMI LINEAR GUIDES

PMI manufactures high-performance, machine tool grade linear guides with high precision and accuracy to meet the demands of industries like medical instrumentation, semi-conductor, and industrial automation. With rails and carriages made from the highest quality steel, PMI's linear guides are reliable and require minimal maintenance to minimize downtime. With the ability to be easily interchanged, PMI's linear rails are an affordable, flexible alternative built to outlast the competition.

## PMI ADVANTAGES

- High rigidity with back-to-back loading design
- High positioning accuracy
- High repeatability
- Variety of sizes
- Rails cut to length - no additional cutting charge
- Machine tool grade linear bearing
- Easy installation with interchangeability
- Minimal maintenance costs
- Long operating life
- Fast lead times

## WHY CHOOSE US?

Accu Tech USA, a Tavoron company, wants to partner with customers to mitigate supply chain issues and provide customized value solutions that meet your application requirements and your budget. Our engineering expertise supports customers in selecting the right linear guide based on the application, accuracy class, and performance characteristics. Offering a wide variety of sizes and classes and our ability to cut stocked inventory reduces lead times and ensures your facility stays operational.

## INDUSTRIES

- OEM Manufacturers
- Semiconductor Processing
- Industrial Automation
- Food & Packaging
- CNC Machine Tools
- Life Sciences
- Packaging & Paper Converting
- Aerospace

*Tavoron is the holding company of Accu Tech USA, the North American Authorized Stocking Distributor of PMI Linear Motion Systems.*
